

# Asset & Property Management

Revenue-generating real estate requires daily management. We have a successful track record representing owners, asset managers and property management companies in all aspects of real estate operations and management.

We assist a wide range of property owners and advisors by preparing and negotiating leases, brokerage, property management, operations and facilities agreements, and construction contracts. We regularly handle real property leasing matters including landlord-tenant conflicts, negotiated tenant workouts and evictions. We support clients through the planning, design, engineering, bidding and construction phases of real estate development and rehabilitation. Our attorneys are well-versed in current approaches, including design-build and other innovative contracting methods.
