Los Angeles, CA 90017

Tina Kim is an associate in the Firm's Infrastructure Group. Her practice encompasses procurement and contracting for large infrastructure projects, project financing and regulatory and compliance matters.

While in law school, Tina served as the Editor-in-Chief for *Law for Business* and was published in *Southern California Interdisciplinary Law Journal*. She was a teaching assistant for George Lefcoe in Real Estate Law and Business. She also served as a judicial intern to the Honorable Julia W. Brand of the U.S. Bankruptcy Court, Central District of California. While in undergraduate school, she minored and researched in UCLA's Urban Planning Department.

EXPERIENCE

California High-Speed Rail Authority. Member of the legal team advising on key elements of the high-speed train system connecting the state's major urban centers. Among many assignments, we advise on the procurement of track and systems using a performance-based design-build-maintain method and administration of the design-build civil contracts. We also helped draft procurement and contract documents and oversaw the award of a nearly \$1 billion design-build contract for the first section. We also assisted organizational conflicts of interest and federal and state environmental permitting.

East County Advanced Water Purification (ECAWP) Joint Powers Authority (JPA) – East County Advanced Water Purification Project. Member of the legal team that advises the JPA in the development of three progressive-design-build/transitional operations packages to provide East San Diego County with sustainable, drought-proof water supply. Once online, it will treat the approximately 15 million gallons per day and produce up to 12,880 acre-feet per year of reliable and locally controlled potable water. The contract was awarded in October 2020. Our services include structuring the transaction, drafting the RFQ, RFP and progressive-design-build/transitional operations contracts.

Orange County Transportation Corridor Agencies (TCAs) – Orange County Public Toll Roads. Member of the legal team advising these agencies on their procurements and contracts. Formed by the California Legislature in 1986, the TCAs plan, finance, construct and operate Orange County's public toll road system. Proceeds from toll revenue bonds primarily financed the system, thus reducing the need for taxpayer investment in roadway development. Nossaman advised on all of TCA's contracts, including more than \$2 billion in design-build contracts and operation and maintenance contracts for toll roads, facilities and systems.
