Los Angeles, CA 90017

In over 41 years with the Firm, Fred Kessler has gained national recognition as a guiding force for public agencies in the field of transportation public-private partnerships (P3s). Clients benefit from his vast experience with innovative procurement, project delivery and financing as well as with negotiated agreements. He is skilled in structuring successful toll concessions, availability payment agreements and design-build and design-build-maintain contracts – and advising on the strategic business decisions behind them.

Helping to advance the nation's sorely needed infrastructure upgrades through non-traditional methods, Fred assisted U.S. Congressional staff in drafting important 2012 changes in federal transportation law that improved and expanded federal credit assistance and tolling programs (MAP-21).

Fred leads or plays an integral role on Nossaman teams assisting major public agencies in creating and implementing P3 programs involving a wide array of award-winning projects. He has served in this capacity for state transportation departments in Texas, Arizona, California, Virginia and Washington, as well as the Los Angeles County Metropolitan Transportation Authority.

EXPERIENCE

Arizona Department of Transportation – P3 Program. Leader of the legal team advising on the transportation agency's P3 program covering a range of projects such as new freeways, freeway and state highway expansions, highway lighting, ancillary operations and facilities and other transportation facilities. Our services included developing programmatic guidelines and manuals, counseling on legislation, initial project screening, feasibility assessments and implementation of project procurements using a variety of delivery methods. Fred's work included the following:

- **I-17 Flex Lanes Project.** Leader of the legal team that advises on an estimated \$320 million project to add lanes along 23 miles of I-17 between Anthem Way and Sunset Point. ADOT will deliver the project under its public-private partnership procurement statute, and may procure a design-build-operate-maintain contract. Flex lanes along 8 miles of I-17 north of Black Canyon City will operate as a separate two-lane facility to carry one direction of traffic at any one time depending on need, with movable gates at both ends to control access. Fred is assisting with all aspects of the procurement, including advice on commercial and legal issues, document preparation, evaluation and selection, and negotiations.
- **South Mountain Freeway.** Leader of the legal team that advised on all aspects of a procurement for the first highway project developed under Arizona's public-private partnership statute. The largest single contract in ADOT's history, the development is also the agency's first DBM project. Besides serving in a key role for all steps in the procurement, Fred advised on determination of risk allocations, a comparative quantitative and

qualitative assessment of several project delivery alternatives, financial structuring, various other legal and commercial issues, and an RFI together with an industry forum. He is currently assisting with contract administration.

- **Flagstaff Facilities.** Co-leader of the legal team that advised on an innovative project to replace the agency's Flagstaff DMV and maintenance facilities. In the Department's first public-private partnership project, ADOT solicited proposals to relocate and consolidate its offices to reduce agency costs in exchange for its existing property available for commercial development. The agency entered into a pre-development agreement with a developer in 2013 and implementation agreement in 2019 completing the transaction.
- **Rest Area P3s.** Co-leader of the legal team that advised on a procurement and contract covering the management of 14 Arizona rest areas under a single P3. The contract with ADOT had a five-year term with an ADOT option to extend an additional five years. The private company was responsible to maintain and operate the rest areas and implement a sponsorship and advertising program to generate revenue. The contract guaranteed ADOT at least \$1 million over 10 years from revenues generated from advertising and sponsorship.

California Department of Transportation – Presidio Parkway. Key member of the legal team advising on this \$1.1 billion project to rebuild a spectacular natural gateway connecting the Golden Gate Bridge with the City of San Francisco. The parkway, which traverses an environmentally sensitive national park and a national historic landmark district, is the first procurement under California's P3 law and only the third highway project developed under an availability payment P3 in the U.S. Fred advised on the DBFOM procurement and contract documents with a Hochtief/ Meridiam joint venture. He also helped structure the contract terms and financing arrangement including a successful application for a \$150 million TIFIA loan. Project funding also included \$45.6 million in equity and \$166.6 million in senior bank loans. Among other duties, he helped negotiate two vital amendments to the contract. Presidio Parkway, which opened to traffic in July 2015, captured many honors. In 2012, it won "Americas P3 Deal of the Year" from Project Finance International; "North American P3 Deal of the Year" from Project Finance magazine; "P3 Project of the Year" from the American Road and Transportation Builders Association; and "Best Real Estate Deal of the Year, Infrastructure/ Public-Private Partnership" from San Francisco Business Times. In 2013, P3 Bulletin named it a finalist for "Best Transport Project of the Year, and in 2016 the National Council for Public-Private Partnerships honored it with the Infrastructure Project Award.

City of Los Angeles – Convention Center Expansion. Co-leader of legal team assisting the City with a sole source negotiation of an implementation agreement for a public-private partnership to expand the Los Angeles Convention Center. This project also includes the renovation of existing facilities, including Gilbert Lindsay Plaza as a pedestrian-friendly open space that can support LACC's outdoor events and the public. Fred is assisting with negotiating strategies, issues analysis and preparation of contract documents.

Los Angeles County Metropolitan Transportation Authority. Key member of legal team currently advising LA Metro and its Office of Extraordinary Innovation on implementation of its P3 program. Fred's work has included the following:

- **Legal Framework** – Prepared a complete analysis of federal and state laws, including Public Contract Code § §22160 et seq. and Government Code §§5956 et seq., affecting LA Metro's P3 procurement and contracting authority for transit and highway projects, as well as federal and state tolling laws.
- **Organizational Structure** – Assisted with analysis and advice to LA Metro on best practices and steps for effectively structuring LA Metro's internal organization to take advantage of P3 delivery opportunities, including advice on a policy statement; procedures for screening and selecting candidate projects; adapting CEQA/NEPA, conceptual and preliminary engineering scopes of work to maintain opportunities for later private sector innovation; interdepartmental P3 training; and organization of a P3 steering committee.
- **Union Station Commercial Development** – Lead legal advisor on the prospective procurement of an exclusive negotiating agreement (ENA) for potential major commercial development of LA Metro and City of Los Angeles properties near LA Union Station. Services include assisting with organizing an industry forum and meetings with major industry players to gauge interest in the project and with preparing an RFQ for the ENA.
- **Grand Central Square Joint Development** – Lead legal advisor in all legal aspects of LA Metro's involvement in the \$42 million, privately held mixed use project located adjacent to the Red Line's Hill Street station in downtown Los Angeles. Fred negotiated and prepared a complex set of agreements governing the financing, renovation, construction, leasing and operation of the project, including subsequent modifications. The transaction included revenue sharing for LA Metro and promoted a private project important to urban revitalization, air quality attainment, affordable housing goals and increased ridership.

- **Sepulveda Pass** – Assisting with preparation for procurement of a PDA for a major transit project (est. \$5-8 billion) through the Sepulveda Pass.

Metro Gold Line Construction Authority – Gold Line LRT. Special outside counsel in the joint development of parcels at four rail stations and implementation of the Authority's fiber-optic leasing program. The agency entered into a program to generate revenues from station-site joint development and a fiber-optic transaction to support issuance of debt essential to financing rail transit construction. Fred's role involved preparing RFPs; negotiating site purchase, sale agreements and CC&Rs; and preparing detailed contract provisions on coordination with freight rail operations within the rail corridor extending from Los Angeles through eastern Pasadena.

Texas Department of Transportation (TxDOT) – Comprehensive Development Agreement. Key member of the legal team that assists TxDOT with negotiating and administering tolling services agreements for providing back office tolling services for TxDOT projects, including its public-private partnership projects. Fred's services include leadership and assistance with procurement, exclusive negotiations, contract documents, concession agreements, DBOM contracts, tolling services agreements, innovative financing arrangements (including applications to the federal TIFIA credit assistance program), contract administration and federal issues.

- **North Tarrant Express Segments 1 & 2W.** Key member of the legal team that advised on the first phase of a project to improve mobility in the Dallas/Fort Worth region. Segments 1 & 2W comprise a \$2.05 billion piece of North Tarrant Express public-private partnership – a managed lanes project that fixed existing highway infrastructure and double existing road capacity. We handled the procurement of a 52-year DBFOM concession agreement to complete Segments 1 & 2W and a pre-development agreement to develop plans and concession agreements for the development of additional segments. The segments opened in October 2014 – six months ahead of schedule. Fred assisted with procurement and drafting of the 52-year toll concession comprehensive development agreement and a pre-development agreement.
- **North Tarrant Express Segments 3A & 3B.** Key member of the legal team that advised on the second phase of an innovative highway improvement and managed lanes public-private partnership to alleviate heavy congestion in the Dallas/Fort Worth area. We assisted TxDOT in negotiating a 2013 concession agreement for the award-winning \$1.5 billion Segments 3A & 3B portion of North Tarrant Express, which rebuilds general-purpose lanes and doubles the existing roadway. Construction of both segments was completed in 2018. Fred assisted with negotiation and closing of a major change order to add the \$750 million, 7-mile Segment 3C to the concession agreement.
- **North Tarrant Express Segment 3C.** Leader in an exclusive negotiation with the NTE Segments 3A & 3B developer to add a \$750 million expansion segment to the public-private partnership agreement. Fred has advised TxDOT on legal authority to proceed by negotiated change order under federal and state law, negotiating strategies, alternatives analysis, and numerous commercial and financial negotiating issues, and prepared a change order agreement and amended and restated concession agreement. The parties achieved commercial and financial close in 2019, with a private activity bond and equity financing structure. The project is now under design and construction.
- **LBJ Express.** Key member of the legal team that advised on a critical project to relieve pressure on a congested 17-mile corridor in the Dallas Metropolitan area. We guided procurement of a DBFOM toll concession for the \$2.7 billion upgrade, one of the largest public-private partnership undertakings in U.S. history. The award winning LBJ Express, the first transportation upgrade to receive federal tolling authorization under the Express Lanes Demonstration Program, reached financial close ahead of schedule in 2010 and completion in 2015. Fred assisted with issue analysis and resolution and helped draft the contract documents.
- **SH 130, Segments 5 & 6.** Lead attorney who advised on the first toll concession agreement in Texas history – a \$1.36 billion 41-mile stretch of tolled lanes and frontage roads between San Antonio and Austin. The award-winning roadway, which opened ahead of schedule in late 2012, extended the SH 130 portion of the Central Texas Turnpike Project to Austin-Bergstrom International Airport. Fred served as a key contract negotiator for the client, recommending negotiating positions and issue resolutions and drafting contract documents.
- **Tolling Service Agreements.** Assisted TxDOT with negotiation of various agreements with the North Texas Tollway Authority for tolling services and related collateral arrangements for TxDOT's projects in the Dallas-Ft. Worth region. The NTTA provides tolling services throughout the region. Fred's work includes advising on agreements for back-office services for the North Tarrant Express, LBJ Express and DFW Connector projects.

Virginia Department of Transportation – Pocahontas Parkway (SH 895). Key member of the legal team that advised on the original \$353 million nonprofit financing of the Pocahontas Parkway, the first procurement under its public-private partnership program, and the related design-build and long-term operations and maintenance contracts. Four years later, Fred helped VDOT negotiate and close an asset transfer and refinancing of the Parkway allowing it to recoup its investment, eliminate future liability and obtain a commitment to build and finance an extension to the Richmond airport.

Washington State Department of Transportation – Tacoma Narrows. Lead special counsel who advised on procurement of the second Tacoma Narrows Bridge and highway improvements and seismic strengthening of the existing bridge. The \$849 million project was initially procured through a pre-development agreement. However, a state court decision and new legislation resulted in the project becoming the state's first major design-build transportation deal. Fred negotiated and drafted the original DBFOM agreement and the ultimate design-build contract for completion of the project.

Washington State Department of Transportation – Innovative Partnerships Program. Key member of the legal team that negotiated five precedent-setting agreements for private financing and development of transportation infrastructure projects. These projects addressed some of the state's largest and most pressing transportation needs, including planning for the SR 520 floating bridge replacement, park-and-ride lots on the I-5 for the Puget Sound region, and the Tacoma Narrows Bridge project. The template comprehensive agreement was the forerunner of modern public-private partnership agreements now used throughout the country. Fred worked closely with the client and other advisors to develop template agreements while simultaneously negotiating and drafting individual P3 contracts.
