

Public Utilities Regulation

We represent investor-owned public utilities, municipalities and other public agencies providing or planning to provide energy, telecommunications, water, video and transportation services to the public. We also represent customers and competitors of public utilities in addressing issues related to utility rates, services and operations.

Our attorneys and legislative advocates practice before the California Public Utilities Commission, the California Energy Commission, other state and local government agencies, and the California Legislature, and also before federal agencies such as the Federal Communications Commission, the Federal Energy Regulatory Commission, and the Surface Transportation Board.

Our experience and expertise in public utilities regulation span a broad range of subjects and proceedings, including:

- Policy Proceedings
- Rulemaking Proceedings
- Utility Rate Cases
- Market Entry Authorizations
- Mergers and Acquisitions
- Customer Complaints
- Enforcement and Compliance Actions
- Transactional Matters
- Utility Relocations

We also arrange for and facilitate one-on-one meetings between our clients and decisionmakers at the CPUC and other public agencies.
