Los Angeles, CA 90017

Co-founder of Nossaman's Infrastructure Group, Nancy Smith is nationally known for her expertise in use of design-build, public-private partnerships (P3s) and other innovative contracting methodologies for public projects. Her pioneering efforts and continuing involvement in the infrastructure development process have laid the groundwork enabling public agencies throughout the U.S. to use non-traditional methods for project delivery.

Nancy has been instrumental in obtaining federal and state legislation allowing use of innovative contracting procedures for public projects. In addition to developing contracts for specific projects, she has advised state departments of transportation and other agencies in establishing a programmatic approach using innovative project delivery methods. She is among a select group of attorneys certified as design-build professionals by the Design-Build Institute of America.

EXPERIENCE

Los Angeles County Metropolitan Transportation Authority – Alternative Delivery Program. Key advisor on the Nossaman team engaged to implement Metro's alternative delivery program. Projects include a pre-development agreement P3 for the \$6 billion to \$10 billion Sepulveda Pass Transit Project to connect the San Fernando Valley with Los Angeles' Westside; use of construction manager/general contractor delivery for the Link Union Station project; assistance with Metro's congestion pricing program; and planning a procurement for the proposed East-West SFV LRT project.

Port of Long Beach – International Gateway / Gerald Desmond Bridge Replacement. Key member of the legal team that advised on the development of a new 1.5-mile cable-stayed bridge to serve one of the world's largest and busiest container ports. We assisted with the \$649.5 million procurement and with contract administration, including claims resolution and project acceptance. We also negotiated agreements for property acquisitions and utility relocations, as well as agreements for transfer of property to the State of California. We are currently negotiating an agreement with the State concerning reimbursement of operation and maintenance costs. The project opened to traffic in 2020.

Los Angeles County Metropolitan Transportation Authority – Microtransit P3. Assisting with LA Metro's two-phase procurement of a pre-development agreement (PDA) for pilot microtransit projects under which the selected private partners are now developing software/technology platforms for a network of small transit vehicles to provide on-demand rides between bus and transit stops and customer origin/destination locations. Contracts for the first phase were awarded in 2018. The second phase involves selection of one or more of the vendors for a three-year implementation of the service in designated zones.

Metro Gold Line Construction Authority – Metro Gold Line. Principal in charge of Nossaman's general counsel work for the Authority and co-leader of the legal team that advised on projects to develop the Metro Gold Line since 2000. We currently advise the Authority on the 24-mile Foothill Extension. Phase 2A of the project, which began service in March 2016, added 11.3 miles of new track along with six new stations and an operations and maintenance facility. Phase 2B will extend the system further east. In August 2019, the Authority awarded the Phase 2B Alignment Design-Build contract, which includes an \$805.6 million base scope for the first nine miles of the project.

Maryland Transit Administration and Maryland Department of Transportation – Purple Line Light Rail. Co-leader of the legal team advising on Maryland's first transit P3 project, an approximately \$2 billion light rail system to facilitate mobility between the Maryland suburbs and Washington, D.C. The project reached commercial close in April 2016 and financial close in June 2016. The Purple Line's financing plan included an \$874 million TIFIA loan, \$313 million in PABs, \$138 million in private equity and approximately \$900 million in federal New Starts funding. We also advise on the implementation of its settlement agreement with the concessionaire and the procurement of a design-build contractor to complete the project. Three shortlisted teams were announced in March 2021.

Santa Clara Valley Transportation Authority – Silicon Valley Rapid Transit Program. Special design-build counsel for the first phase of the SVBX project, co-leading the legal team that advised VTA in structuring the design-build procurement and drafted the procurement and contract documents for VTA's \$722 million 2011 contract. She also oversaw Nossaman's work relating to negotiation of arrangements for BART to provide train cars as well as operations and maintenance services for the new line, and served as co-leader of the legal team advising VTA on a design-build procurement for parking structures at the stations. Nancy's role has also included assisting VTA in administration of the design-build contract and addressing issues relating to FTA funding for the project. She is currently working with VTA on multiple joint development projects, with a team of lawyers based in Nossaman's San Francisco office.

Orange County Transportation Authority – I-405 Improvement Project. Co-leader of the legal team engaged as part of the Authority's program management team to advise on a project to add a general purpose lane and an express toll lane in each direction, as well as the conversion of an existing HOV lane in each direction, between SR 73 and I-605 in Orange County, California. The project, the largest highway upgrade in Southern California, will relieve pressure on one of the state's most congested corridors. In November 2016, the Authority awarded a \$1.2 billion design-build contract to a consortium led by OHL USA Inc. and Astaldi Construction Corp. Construction on the project, estimated to cost \$1.9 billion overall, began in 2018. Nancy's role has included drafting and reviewing contract and procurement documents for the project.

New York State Thruway Authority – Tappan Zee Bridge. Key member of the program management team that advised on the replacement of an aging three-mile-long cantilever bridge over the Hudson River with a new cable-stayed, dual-span structure designed to last a century. To help deliver the project, Nossaman drafted procurement and contract documents and assisted with the procurement, resulting in a \$3.1 billion design-build contract with a Fluor-led consortium – \$800 million less than the next lowest bidder – in the first such deal undertaken by the transportation agency and the largest in the country to date. The new Governor Mario M. Cuomo Bridge opened to traffic in 2017. Nancy led the legal effort for review of enabling legislation, assessment of project risk, production of procurement and contract documents, participation in meetings with proposers, dealing with surety issues, assisting in evaluation of SOQs and proposals and participating in contract negotiations.

Los Angeles County Sanitation Districts – Alternative Delivery Advice. Co-leader of the Nossaman team providing advice to the Districts regarding legal authority in California for alternative delivery projects, assessment of projects for alternative delivery, assistance in setting up procurement procedures and forms for job order contracts, and ongoing advice on alternative delivery procurement and project issues.

City of Los Angeles, Department of Public Works, Sanitation & Environment (LASAN) – Alternative Delivery Projects. Services include:

- Lead attorney for the Nossaman team that advised the City on a DBOM contract for a digester gas utilization project within the Hyperion Treatment Plant, completed in 2017. The digester uses gas byproduct from wastewater treatment to generate electricity and steam for use in the wastewater treatment and water reclamation process – reducing the plant's reliance on the electrical grid. Services included assisting with the instructions to proposers, drafting contract documents for the RFP, advising on issues during the proposal review process, negotiating with the selected proposer, revising and finalizing the contracts, commenting on staff reports involving the contract award and helping the City Attorney's Office with various matters relating to

the procurement.

- Co-leader of the Nossaman team that assisted the Los Angeles City Attorney's Office with the procurement of a progressive design-build contract by the City's Bureau of Sanitation, for an Advanced Water Purification Facility (AWPF) at the Hyperion Water Reclamation Plant (HWRP). Services included assisting with the RFP, drafting contract documents, and assisting with negotiation of a guaranteed maximum price for the construction phase. The project, which is part of the City's long-term water management objectives of "fully" reusing water from the HWRP, will include an advanced water purification facility treating primary effluent from the HWRP to high-quality, nitrified denitrified (NDN) reclaimed water suitable for reuse.
- Assisting the City Attorney's Office with a Design-Build-Finance-Operate-Maintain (DBFOM) procurement for development of an organics processing facility (OPF) for the Central Los Angeles Recycling and Transfer Station (CLARTS), as well as a DBFOM contract for a new campus accommodating LASAN staff, laboratory, research and other facilities.

Orange County Transportation Corridor Agencies (TCAs) – Orange County Public Toll Roads. Lead attorney advising these agencies on all aspects of planning, developing and operating their toll road system since 1990. The TCAs were formed by the California Legislature in 1986 to plan, finance, construct and operate Orange County's public toll road system. The system was primarily financed with proceeds from toll revenue bonds, reducing the need for taxpayer investment in roadway development. Nancy is the lead attorney for all of TCA's contracts, including more than \$2 billion in design-build contracts and operation and maintenance contracts for toll roads, facilities and systems.

City of San José – Norman Y. Mineta San José International Airport. Key member of the legal team that assisted in negotiating and administering a design-build contract for a precedent-setting \$660 million airport expansion serving California's Silicon Valley. The project, the first major airport design-build undertaking in the state, included the renovation and expansion of Terminal A, a new Terminal B, a 3,000-space consolidated rental car facility and related roadway improvements. The project received more than 25 industry awards.

Metropolitan Transit Authority of Harris County, Texas – METRO Solutions Phase 2. Leader of the legal team that advised on a project to extend the Houston METRORail system. The first leg of the system, the 7.5-mile long Red Line, boasts one of the highest ridership rates in the country since opening a decade ago. Metro Solutions Phase 2 is a \$1.46 billion project to design, build, equip, operate and maintain three additional rail lines. The Authority awarded a development agreement to Parsons Transportation Group Inc. and a design-build contract to a Parsons/Granite/Kiewit joint venture, with vehicles acquired from CAF. The Red Line northern extension opened in December 2013 and the Green Line (East End) and Purple Line (Southeast) began service in 2015. Nancy's work included advising on the turnkey contract to develop the extensions, producing procurement and contract documents, negotiating the original contracts and negotiating subsequent modifications.

Washington State Department of Transportation – Alaskan Way Viaduct Replacement. Leader of the legal team that assisted the State Attorney General's Office on the \$1.35 billion design-build contract to replace the 60-year-old Alaskan Way Viaduct with SR 99, the world's largest-diameter bored tunnel. The two-mile waterfront tunnel through downtown Seattle opened in February 2019. It incorporates a double-decked roadway with incoming and outgoing traffic on different levels. Nancy's role in the Alaskan Way Viaduct project included reviewing procurement and technical documents, assisting in risk analysis and development of incentives/disincentives to align the contractor's incentives with the owner's, drafting contract documents, and helping with contract administration issues.
